Attachment A Legend

Shunting Station and Cement Factory of 2dolbunov

Lagend:

1. 7 or 8 small workshops or signal-lamp sheds extending west of the station area for about 300 m. along the north side of the trackbed. Each measures about 12 x 6 m.

2. A 2-storied, concrete, newly built passenger station, measuring 25 x 60 m.

- 3. A red brick semicircular roundhouse with a turntable for 2 tracks. Capacity: 12 engines.
- 4. Slag removal shop, 12 x 20 m., equipped with 5 tracks. Overhauling of regular engines is done on the 2 southern tracks, while overhauling of shunting engines is done on the 3 northern tracks.

Metal water tower, about 15 m. high and 2 m. in diameter.

6. Red brick warm-up shed, 100 x 8 x 7 m. Engines are warmed up here in the winter.

7. 3-storied mess hall, $12 \times 25 \times 50 \text{ m}$.

- 8. White semicircular roundhouse with a turntable for one track. Capacity: 12 engines.
- 9. Administration building with built-on power plant (coal heated) and garage for the fire department. 3 stories high and 50 x 25 m.

10. Red brick water tower, about 20 m. high and 5 m. in diameter.

11. Vehicle repair shop, 80 x 300 m., equipped with 3 branch tracks, used for assembly and repair.

12. Larger grey roundhouse, 18 x 350 x 6 m.
13. Red brick grain silo, 30 x 150 x 8 m.

- East signal installation (green on Attachment A): 5 signals between the tracks used by shop 11, located about one km. east of the curved shunting track which runs between the tracks to Shepetovka and those to Lvov.
- Signal installation near the administration building: 5 signals used by shop 11.
- 16. West signal installation: 4 signals located about 900 m. west of the pedestrian over-pass, used by the warm-up shed.
- 17. Single signal on north side of the Lvov trackbed, even with the southeast corner of the cement factory, about 800 m. southeast of water tower 20.
- Single signal east of the curved shunting track between the tracks to Shepetovka and those to Lvov.
- Single signal on the southwest side of the curved shunting track. South of water 19. tower 20.
- 20. Mater tower, 20 m. high and 5 m. in diameter.
- 2-storied building which quarters the station police. It is on the north side of the road north of the passenger station.
- Coaling station equipped with 9 tracks 400-500 m. long, with coal heaps between them. No automatic coaling equipment is on hand.
- 4 small switchman's sheds, 1.5 x 2 m.:
 - a. at north end of shunting track
 - b. south of water tower 10
 - c. south of roundhouse 3
 - d. south of water tower 5
- 3 large switchman's sheds, 3.5 x 4 m.:
 - a. next to signal 18
 - b. south of mess hall 7
 - c. south of passenger station 2.
- Cement factory area.

Legend for Cement Factory Area:

- A. Fower Plant turbines
- B. Garages
- Mess hall C.
- D. Office
- E. Workers' billets
- F. Supply depot
- G. Carpentry
 H. Machine shop
- J. Silo
- K. Factory
- L. Factory
